

CAIQUE BISPO

Full Stack Developer PHP | Laravel | SaaS Product Founder

Curitiba, PR, Brazil | +55 41 99223-5576 | caiquebispodanet86@gmail.com

linkedin.com/in/caique-bispo | github.com/caiquebispo

PROFESSIONAL SUMMARY

Full Stack Developer with 7 years of experience in PHP and Laravel, specialized in architecting and delivering complete systems, from planning to deployment. Track record of technical leadership in modernizing monolithic platforms into scalable APIs, building financial systems with banking integrations (Pix instant payments, boletos and batch payments) and running AI agent automations in production. Founder of my own SaaS products (RamoVivo and NotaSimples).

PROFESSIONAL EXPERIENCE

Founder & Developer | RamoVivo

06/2026 to Present

ramovivo.com.br

- Founded and develop RamoVivo, a SaaS management platform for churches (treasury, children's ministry with check-in, volunteer scheduling, member directory and small groups), working across the entire product lifecycle, from architecture to deployment.
- Responsible for end-to-end technical and product decisions, including data modeling, reactive front-end and infrastructure, with CI/CD and automated Git-based deployment, unit tests, queues and caching.
- Technologies: Laravel, Livewire, Alpine.js, TALL Stack UI, queues, caching, CI/CD.

Full Stack Developer | QFrotas

02/2026 to 09/2026

afrotas.com

- Architected, planned and deployed the company's new system in Laravel and Livewire, replacing the low-code platform previously in use.
- Built an AI agent automation that receives invoices submitted by partner providers and validates their data and all reported taxes, eliminating nearly all manual work in an internal department.
- Architected and implemented the internal financial system end to end, with invoice issuance through a partner system and integration with Banco do Brasil and Itaú for batch payments, Pix, boletos and transfers between accounts, all centralized in the platform.
- Set up the quality and delivery pipeline: CI/CD with automated Git-based deployment, unit test coverage, queues for asynchronous processing and caching for performance.
- Technologies: PHP, Laravel, Livewire, MySQL, queues, caching, CI/CD, unit testing, banking APIs, AI agents (LLMs).

Full Stack Developer (Remote, Contractor) | Sistema IO

02/2020 to Present

sistemaio.com.br

- Led the technical modernization of a monolithic platform (PHP 7.4 / Laravel 5) into an API-based architecture (PHP 8.1 / Laravel 10), used by over 800 hotels and more than 3,000 users.
- Developed and maintained API integrations with third-party systems (Erbon, Hist), ensuring secure and stable communication between services.
- Refactored endpoints to RESTful standards, focusing on performance and architectural maintainability.
- Technologies: PHP, Laravel, REST API, MySQL.

Full Stack Developer | Guimepa

07/2024 to 06/2025

guimepa.com.br

- Developed the IPV margin module for the Hardness system, integrating tax, cost and gross margin calculations.
- Delivered a feature that increased the business's financial visibility and supported pricing and marketplace decisions.
- Technologies: PHP, Anymarket and Magento integrations.

PRODUCTS AND PROJECTS

NotaSimples: Electronic service invoicing (NFS-e) and financial management

notasimplesbr.com

- Platform for issuing Brazilian electronic service invoices (NFS-e) integrated with the government's National Standard (DPS), featuring accounts receivable management, batch issuance and dedicated access for accountants. Built in partnership with an accountant.

Quill Editor

packagist.org/packages/caiquebispo/quill-editor

- Component that integrates the Quill text editor with Laravel Livewire, providing rich and reactive editing.

Notification Bell

packagist.org/packages/caiquebispo/notification-bell

- Real-time notification component for Laravel Livewire, with a dynamic icon and event support.

TECHNICAL SKILLS

Product Building (0 to 1): Ideation, architecture, development and launch of SaaS products from scratch, proven with 2 products of my own (RamoVivo and NotaSimples)

Backend: PHP, Laravel, Livewire, Filament, RESTful APIs, Composer

Architecture and integrations: Software architecture, RESTful APIs, banking integrations (Banco do Brasil, Itaú), Pix, boletos, batch payments, NFS-e invoicing, queues, caching, CI/CD, AI agents

Frontend: Vue.js, Alpine.js, JavaScript, jQuery, HTML, Bootstrap, Tailwind CSS

Databases: MySQL, SQL

Testing: PHPUnit, Pest, unit testing

DevOps / Tools: Docker, Git, GitHub, CI/CD (automated deployment), Swagger, Postman

Other languages: Python

Artificial Intelligence: Daily use of AI tools in development (GitHub Copilot, Cursor, Claude Code) for productivity and code quality; LLM integration (OpenAI, Claude) via API in product solutions; prompt engineering applied to process automation and content generation.

EDUCATION

Associate Degree in Systems Development (Tecnólogo)

Unopar | 2025 to 2028 (in progress)

LANGUAGES

Portuguese: Native

English: Intermediate
